EDUCATION

BACHELOR'S DEGREE

Colorado Technical University
Computer Science – Software Engineering
Honors: Magna Cum Laude

TECHNICAL SKILLS

Programming & Scripting

Python, Groovy, PowerShell,
HTML, CSS, foundational Java

Databases and Query Languages

PL/SQL, T-SQL, MySQL,
relational schema design, query
optimization

APIs & Data Formats

JSON (API payload and
integration), XML

Enterprise Tools & Platforms

Oracle JDE E1, Orchestration
Studio, SharePoint (workflows
and administration), Bartender
(SQL-Driven Labels),
Perceptive Content, ServicePro
(ticketing & workflow
management)

Automation & Workflow Tools

Power Automate and Microsoft
Copilot

Core Strengths

Application development,
troubleshooting, user-focused
problem-solving, friendly and
outgoing communication style

SUMMARY

Software Developer with hands-on experience in software development, workflow automation, and enterprise systems. Recognized for collaborative approach and rapid mastery of new technologies, languages, and environments. Skilled at building secure, reliable solutions that optimize business processes and enhance user experience, with a strong foundation in debugging, application support, and cross-team communication. Known for stepping confidently into new environments, learning unfamiliar systems quickly, and bringing a friendly, solutions-oriented approach to the team.

PROFESSIONAL EXPERIENCE

ASSOCIATE SOFTWARE DEVELOPER

MARCH 2025 – PRESENT

Bal Seal Engineering

Partner closely with teams across the organization to understand their processes, identify pain points, and translate needs into reliable, user-friendly software solutions. Design and maintain custom applications, support core enterprise platforms, and ensure each tool is intuitive, secure, and aligned with operational goals.

- Developed a robust operations tool monitoring application using custom tables, business views, and extensive error-handling, giving leadership real-time operational insight.
- Built a mission-critical engineering application providing visibility into essential machine parts, using physical and virtual tables, multi-view interfaces, and a JSON-driven orchestration that facilitated a handshake between Microsoft SQL and Oracle SQL, retrieving data from MS SQL, transforming it, and passing it into an Oracle SQL table to support seamless cross-system integration and full-stack adaptability.
- Enhanced ERP applications, optimized SharePoint workflow automation, and developed SQL-driven enterprise labels that increased data accuracy and reduced manual errors.
- Rapidly delivered updated financial extract files to meet new bank specifications, ensuring seamless processing of all transactions.
- Maintained high performance during organizational transition by supporting systems administration, resolving complex help desk issues, and delivering development projects simultaneously.
- Quickly mitigated a post-deployment issue reported over the weekend that threatened to halt global sales operations; diagnosed a server-cache fault and implemented a fix before the first international office began its workday, ensuring zero business interruption.
- Built strong relationships with production, finance, and IT teams through friendly, clear communication and a collaborative approach.

HELP DESK ANALYST

AUGUST 2023 – MARCH 2025

Bal Seal Engineering

Provided frontline technical support across the organization, resolving a high volume of software, hardware, and networking issues while managing onboarding, access control, and system configurations. Led process improvements and contributed to major incident recovery efforts.

- Streamlined onboarding/offboarding by managing account setup, system configuration, and access provisioning in full compliance with audit standards.
- Led help-desk improvement initiatives, including implementing a secure password manager for IT and high-impact users.
- Managed a \$200,000 annual IT budget and reduced computer acquisition costs by 10% despite rising hardware prices.
- Collaborated with the team to restore essential systems during the 2024 global CrowdStrike outage, enabling full operational recovery for 600+ employees within 24 hours.

IT INTERN

APRIL 2023 – AUGUST 2023

Bal Seal Engineering

- Supported IT operations by assisting with help desk requests, configuring hardware and software and contributing to process improvements that increased and user satisfaction.
